**TLA is Planning and Engineering Its Expansion**

**Roseville, CA – April 3, 2006** – Terrance E. Lowell & Associates, Inc. (TLA), a California Corporation providing Land Planning and Civil Engineering services, today announced it has hired seven new employees in a three month timeframe.

On January 25<sup>th</sup>, the TLA management team met to discuss their strategic growth plan to continue to serve their Clients in the private and public sector. Based on their discussions and findings, they resolved to expand the company by nine employees in 2006 in order to provide the excellent level of service to our existing Clients, while opening up the doors for future Clients.

To date, TLA has grown its employee base by 24% to 30 employees. The technical expertise gained includes: three Civil Engineers, a Land Planner and an Engineering Technician.

“TLA’s Principals decided to step out in faith to strategically grow our company along several fronts”, said Terry Lowell. “The first step was to acquire the star talent to continue providing quality professional consulting services to our current Clients. The next phase of our growth plan includes a Business Development strategy to reach potential Clients that are seeking a Consultant that has a long standing history of quality project management. Our approach to planning and engineering is keeping the Client’s project goals in mind throughout the project duration, while exceeding the Client’s expectation for quality. TLA is a steadfast firm, with its foundation in place and rooted in quality, ready to take the next step towards growth. We are now moving forward”.

With the acquisition of this new talent and knowledge, TLA is poised to expand their project base and service offerings to their current and future Clients in both the public and private sectors.

*TLA, based in Roseville, California, is a design and engineering firm dedicated to providing a full-range of services to private and public Clients. Established in 1985, the firm specializes in planning, designing, engineering and managing projects that range from small residential developments to large mixed use projects. Experience earned over many years and across all varieties of development projects provides the necessary foundation for a wide range of capabilities. Each project is undertaken with an eye towards providing solutions that allow projects to proceed smoothly. Our extensive work with government agencies provides Clients with a knowledgeable ally in moving a project through to completion. TLA's particular expertise in hydrology and hydraulic engineering has been valuable in our work throughout the Northern California region.*
