TLA is Passionately Pink for the Cure™.

Roseville, CA – October 6, 2006 – Terrance E. Lowell & Associates, Inc. (TLA), a California Corporation providing Land Planning and Civil Engineering services, announced today its continued support of The Susan G. Komen Foundation's "Passionately Pink for the Cure™" on Friday, October 6.

Knowing that 212,920 women and 1,729 men in the U.S. will be diagnosed with breast cancer, TLA wants to make an impact by supporting the Komen Foundation's Passionately Pink for the Cure. TLA's employees will be wearing their finest pink articles of clothing in exchange for a \$5 donation. The company will be matching all donations in order to maximize their contribution. Last year, TLA and its 22 employees raised over \$720 that went towards research, education, screening and treatment programs in the fight against breast cancer.

"This year we are challenging our 28 employees to go above and beyond last year, by raising over \$1,000.00," said Terrance Lowell, President of TLA. "Our hope is to see the number of cases of this disease diminish based on the Komen Foundation's work."

TLA's employees have been contributing to this worthy cause since 2001, in addition to participating in the Susan G. Komen "Race for the Cure" events. Since many of the TLA employees have been touched personally by this disease, there is a strong desire to raise funds to find a cure. The goal for October 6th is to see as much pink as possible, to remind people of the goal to eliminate and eradicate breast cancer.

Terrance E. Lowell & Associates, Inc., based in Roseville, California, is a design and engineering firm dedicated to providing a full-range of services to private and public Clients. Established in 1985, the firm

specializes in planning, designing, engineering and managing projects that range from small residential developments to large mixed use projects. Experience earned over many years and across all varieties of development projects provides the necessary foundation for a wide range of capabilities. Each project is undertaken with an eye towards providing solutions that allow projects to proceed smoothly. Our extensive work with government agencies provides Clients with a knowledgeable ally in moving a project through to completion. TLA's particular expertise in hydrology and hydraulic engineering has been valuable in our work throughout the Northern California region.
